**Press release January 19, 2022**

# Sensys Gatso USA has won a five-year TRaaS contract from Gates Mills, Ohio worth SEK 9.2 million

**Sensys Gatso Group, a global leader in traffic safety systems, through its subsidiary, Sensys Gatso USA has been selected as the automated Speed enforcement provider for Gates Mills, OH. This new managed service program is expected to generate approximately USD 1,022,000, corresponding to SEK 9.2 million over the five-year term.**

Gates Mills is a village in northern Ohio, with feeder roads carrying commuters through their city each day. The location of the automated speed enforcement systems was chosen as a result of traditional enforcement being difficult to operate at those locations. Automated speed enforcement provides a viable alternative allowing for 24/7 enforcement and allowing the police officers of Gates Mills to handle other important police duties.

The program will likely commence in the first half of 2022 and will consist of fixed T-Series speed cameras and Xilium backoffice software to process the citations. The five-year contract also allows for several one-year extensions.

*"We are very excited to partner with Gates Mills in their traffic safety initiative. We know, based on experience that when a town or city chooses automated enforcement that this will increase traffic safety in the community. This will lead to less traffic crashes and consequently to less fatalities and injuries. We are pleased that we can contribute in this effort the towns and cities are making." says Dorian Grubaugh, Sales Director at Sensys Gatso USA.*
