Press release March 4, 2022

Sensys Gatso has received a purchase order for red-light and speed enforcement in Belgium worth SEK 6 million

Sensys Gatso Group, a global leader in traffic safety solutions, through its subsidiary Sensys Gatso Netherlands, has been awarded an order to supply and support the Belgian Walloon Government with traffic enforcement products and services. Sensys Gatso will deliver its T-series systems and related services for an estimated value of EUR 575.000, corresponding to SEK 6 million.

This order for Sensys Gatso's state-of-the-art T-series has been received through Sensys Gatso's Belgian partner Equans. Using innovative tracking radar technology, the T-series continuously monitors and accurately tracks the speed and position of multiple vehicles in the target area simultaneously, to identify speeding and red-light violations and provide precise identification of violating vehicles. The systems are expected to be fully installed and operational by the third quarter of 2022.

"We are very pleased that our role as partner to the Walloon Government has yet again been rewarded with an order for our traffic enforcement solutions. We look forward to continuing building on this relationship and providing our support to the governments of Belgium in our shared objectives of making roads safer", says Peter Ward, Sales Manager, Sensys Gatso.
