# Sensys Gatso secures a purchase order for traffic enforcement systems in the Middle East worth SEK 26 million, as part of the SEK 152 million procurement award

**Sensys Gatso Group, a global leader in traffic safety solutions, through its subsidiary Sensys Gatso Sweden, has received a purchase order worth SEK 26 million from a local partner in the Middle East under the five-year procurement award worth SEK 152 million announced on June 12th, 2023. The order is for the delivery of speed and red-light enforcement systems. The first order worth SEK 16 million was delivered in 2023 as a part of this procurement agreement.**

Sensys Gatso has over a longer period of time built up a large installed base of systems in the Middle East. While still fully operational, some of these systems are in need of an upgrade in order to offer our end-customer the ability to enforce a variety of dangerous driving behaviours. Therefore, the customer initiated a 5 year program in 2023 to both add to and replace the current installed base.

Besides state of the art speed enforcement solutions, Sensys Gatso has a particularly strong position within intersection safety where not only red-light violations are enforced, but also other types of dangerous behaviours in the intersection, such as illegal turns, blocking the intersection and/or the pedestrian crossing and more.

*"We are delighted to have fulfilled the initial SEK 16 million order as planned. With this new purchase order we appreciate the continued trust and confidence from our partner and end-customer. This underscores our commitment to delivering innovative and reliable solutions that contribute to enhanced road safety in the region",* says Saman Alae Naziri, General Manager of Sensys Gatso MENA.
